Past life regression is a technique that uses hypnosis to recover what practitioners believe are past experiences or memories. The technique used during past-life regression involves the subject being guided by the hypnotist through the hypnotic state to explore past lives. This process can reveal insights into the subject's current life experiences and can be used in various therapeutic contexts.

A 2006 survey found that a majority of a sample of doctoral level mental health professionals who specialize in hypnosis 

They believe that academic language is both general and content specific. Social sciences - South African History Online Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects by the end of grades 2, 5, 8, and 12 with an understanding that these subjects the way it does for math, reading, and science, we do have occasional national assessments. Why don't more students reach the Proficient level in history, civics, or economics? What are some reasons for this?
